

## 1265 Series Alarms

Pump Controllers | Liquid Level Alarms

### Features

The Maxijet Liquid Level Alarms are designed to provide a warning indication when tank is either empty or full (Effluent, Grey Water or Rain Water etc).

A float switch determines a warning indication.

Warnings are; Audio (buzzer)  
Visual (LED Pilot Light and / or strobe)

The Buzzer can be muted via a mute button. If not muted the audible buzzer will automatically silence after 5 minutes. If a continuously sounding audible alarm is required, this can be done by changing the Jumper position on the circuit board.

The visual alarms will continue to remain on until the alarm condition is eradicated. A standard feature of the level alarm is a 'Voltage Free' (5Amp rated) output for connection to auxiliary devices.

The controller can be installed up to 50m from the tank being monitored. Float Switch cabling is 'safe', low voltage circuitry.

### Model Range

Model	Description
FPC-12650	Liquid Level Alarm - Standard
FPC-12651	Liquid Level Alarm - Deluxe

## Solar Powered Alarms

Pump Controllers | Liquid Level Alarms

### Features

Designed to provide warning indication and alarm when a water storage tank is either full or empty.

Housed in a robust powder coated metal enclosure, the alarm features audible and visual alarms and a keypad interface with status indicator lights and alarm mute button. The solar powered version includes a solar panel for power supply in applications where mains power is unavailable.

Warnings are; Audio (buzzer)  
Visual (LED Pilot Light and/or Strobe)

The Buzzer can be muted via a mute button. If not muted the Audible buzzer will automatically silence after 5 minutes.

### Model Range

Model	Description
FPC-12658	Liquid Level Alarm - Solar Powered

HSA-18003

If a continuously sounding audible alarm is required, this can be done by changing the Jumper position on the circuit board.

The visual alarms will continue to remain on until the alarm condition is eradicated.

A standard feature of the Level Alarm is a 'Voltage Free' (5Amp rated) output for connection to auxiliary devices. Float Switch cabling is 'safe', low voltage circuitry. The system includes battery, solar panel and 10m float switch.
